Cinema Rhapsody Mach III Theater Controller

The Cinema Rhapsody Mach III is an extremely advanced home theater controller that switches, decodes and preamplifiers complex analog and digital audio signals for the ultimate home theater experience. This third generation preamplifier offers new features making it the most technologically powerful preamplifier/controller available. Designed, engineered and manufactured in the United States of America, the Cinema Rhapsody Mach III is the cornerstone of your digital home cinema. Here are some highlights.

Modes - The Cinema Rhapsody Mach III features all Dolby, DTS and THX modes including the very latest Dolby Pro Logic IIx, DTS Neo6 Film & Music, and THX modes including the THX Game mode which is ideal for video gaming.

Favorite Modes - With 75 modes, ADA has made it possible to store and scroll through the modes specific to your theater's setup.

Double-Default Mode Auto Detection (DDMAD) - This unique ADA feature engages the best surround sound mode for the input selected and audio signal present. With DDMAD, you never need to worry about selecting modes manually.

Balance Presets - The Cinema Rhapsody Mach III features four balance presets which store speaker levels and time delays. This permits you to setup four "sweetspots" so that as you watch movies, TV or listen to music in different seating positions, the perfect balance levels are recalled for that spot.

Speaker Configuration Presets - The Cinema Rhapsody Mach III also permits you to store four speaker configurations. So if you are listening to music and your theater features full-range speakers, you can play bass information through these speakers.

Easy Operation or Advanced Control - ADA has designed the Cinema Rhapsody Mach III so that all you do is select the device you want to view or listen to and the Mach III does the rest. Alternately, the Mach III is capable of being manually controlled for those who enjoy customizing their system.

Installer & Factory Reset - The Cinema Rhapsody Mach III can be reset to the exact settings created by your custom installation professional at any time.

Audio Connectivity

- **8 Stereo Analog Audio Inputs**
- **8 Digital Audio Inputs**
 - **5 Coax Digital, 3 TOS-Link Optical**
- **6-Channel Analog Bypass Audio Input (DVD Audio or SACD Multi-Channel)**
- **7.1 Channel Analog Audio Output**
- **2 Channel Stereo Analog Audio Output (Record)**
- **Coax Digital Audio Output**

Video Connectivity

- **8 Composite Video Inputs**
- **8 S-Video Inputs**
- **8 Component (HDTV) Inputs**
- **2 Composite Video Outputs**
- **2 S-Video Outputs**
- **2 Component (HDTV) Video Outputs**
- **2 Record Composite Video Outputs**

Additional Connectivity

- **2 Programmable Low Voltage DC Triggers**
- **ADA Bus Data Port (ADA Integration)**
- **Ethernet Communication Port (T10-100)**
- **Switched AC Power Outlet (10 Amp)**
- **Removable EIC AC Power Cord**

HANDCRAFTED WITH PRIDE IN
